INTERNATIONAL EXPERIENCE

Australia – Facilitate Digital

From March/2012 to June/2012

While working for Admotion, I helped with the creation of the rich media team at Facilitate Digital, in Sydney.

Argentina – Admotion Sistemas

August 2010 and March 2012

I attended to JavaScript trainings and helped with the development of AFA, Admotion's main product.

PROFESSIONAL EXPERIENCE

Freelancing

2007 - 2009, 2013 - Present

As a freelancer, I develop apps, sites, e-commerces and any kind of digital solution that you or your clients may need. In my website, ericprieto.com, you can check some of my works and contributions to the programming community.

Interativa Events

Head Developer, DevOps and Project Manager

2015 - 2016

At Interativa Events, I acted as head developer, planning and programming all of the company's projects. Every week, we created apps for our customers' events, like survey apps, social media totems, RFID systems and games.

Havik/Kenoby

Head Developer, DevOps and Project Manager

Oct/2013 – Mar/2015

At Havik, one of the biggest HR Consulting Firms in Sao Paulo, I've developed Kenoby, which is an applicant tracking software that improves head hunters efficiency and precision.

ListenX

UX Designer and Front-End Developer

Jan/2013 – May/2013

I've designed and developed the front-end of many of the company's internal and external softwares, focusing in usability and user experience.

Admotion Sistemas

Developer, Solution Architect

2009 – 2012

With Admotion, I've had the chance to build internal and external projects using many tools and languages, like ActionScript, Flash Media Server, .NET, PHP.

I've contributed to online advertising developing several different kinds of rich media ads, from games to video chats and augmented reality. I also created new ad formats and algorithms for better ad delivery, with high performance and low data cost.

I've created the Internal Solutions Department, a team focused on the elaboration of new tools and processes, aiming for improvements in productivity and quality assurance across the whole company.

RTI Consulting

PHP and Front-End Developer

2004 – 2006

I've developed several projects from conception to delivery, like e-commerces, websites, and custom CMSs.
